

BUCHI SOLVENT RECYCLING – SAVE THE ENVIRONMENT AND MONEY

GO GREEN!

BUCHI INDUSTRIAL ROTAVPORS CAN BE USED TO RECYCLE YOUR HIGH USE SOLVENTS, IN YOUR LABORATORY.

Buchi Rotavapors are commonly employed within universities, histology departments, contract laboratories and other high use environments for the recycling of solvents. This technique has been implemented all over the world. It is proven to have a fast payback, in many cases in less than a year, and significantly reduces the environmental impact of the laboratory. It also removes the need to arrange waste disposal.

Buchi Industrial Rotavapors provide an efficient technique that can be fully automated not only saving time but also your money and the environment.

Buchi provide 5L, 20L and 50L capacity options, both batch and continuous systems are available.
